Kentaro Wada

Hammersmith, London, United Kingdom
www.kentaro.wada@gmail.com • +44 7535-753123
Date of birth: 31 January 1994 • Nationality: Japan • Portfolio: wkentaro.com

---

EDUCATION

Imperial College London
PhD in Computing *2018 – 2022*
Supervisor: Prof. Andrew J. Davision

The University of Tokyo
MS in Information Science and Technology *2016 – 2018*
BE in Mechano-Informatics *2012 – 2016*
Supervisors: Prof. Masayuki Inaba, Prof. Kei Okada

DISTINCTION

PhD President's Scholarship of Imperial College London *2018 – 2022*
Full funded scholarship, and fifty PhD students are selected each year.

IEEE Robotics and Automation Society Japan Joint Chapter Young Award at IROS2018 *2018*
Five Japanese students are nominated based on their papers at the conference.

Google Summer of Code Student *2016*
Completed an open source project from the Open Source Robotics Foundation.

Kentaro Wada, Edgar Sucar, Stephen James, Daniel Lenton, and Andrew J. Davison, "MoreFusion: Multi-object Reasoning for 6D Pose Estimation from Volumetric Fusion", *IEEE Conference on Computer Vision and Pattern Recognition (CVPR)*, 2020. [Paper] [Video]

Kentaro Wada, Shingo Kitagawa, Kei Okada, and Masayuki Inaba, "Instance Segmentation of Visible and Occluded Regions for Finding and Picking Target from a Pile of Objects", *IEEE International Conference on Intelligent Robots and Systems (IROS)*, 2018. [Paper] [Video]

Kentaro Wada, Kei Okada, and Masayuki Inaba, "Probabilistic 3D Multilabel Real-time Mapping for Multi-object Manipulation", *IEEE/RSJ International Conference on Intelligent Robots and Systems (IROS)*, 2017. [Paper] [Video]

RESEARCH EXPERIENCE

Leading the UTokyo Team at the Amazon Robotics Challenge *2015 – 2017*
JSK Robotics Laboratory at the University of Tokyo

- Objectives: To develop a robust state-of-the-art robot picking system for warehouse automation. 2015 edition: Verification based robust picking system by in-hand recognition. 2016 edition: Deep learning based 3D semantic segmentation. 2017 edition: Few-shot deep learning of novel object segmentation using only instance images.

KEY SKILLS

- Programming skills, especially with Python and C++, trained in the research use and contributions to open source projects at GitHub.
- Experience and knowledge of constructing a large robot vision system integrating various kinds of hardware and software with the Robot Operating System (ROS).
- Knowledge of deep learning implementation with the frameworks including, Chainer, PyTorch and Caffe, and GPU computing using CUDA.

INTERESTS

Deep learning, Real-time SLAM, Robotic manipulation.
